Written by [EDA Geek News Staff](#) the 22/05/2008

Robots! Robots on Mars and in oceans, in hospitals and homes, in factories and schools, robots fighting fires, making goods and products, saving time and lives. Robots today are making a considerable impact on many aspects of modern life, from industrial manufacturing to healthcare. Reaching for the human frontier, robotics is also vigorously engaged in the growing challenges of new emerging domains. Interacting, exploring, and working with humans, the new generation of robots will increasingly touch people's lives. The prospect of practical robots among humans follows half a century of robotic developments that established robotics as a modern scientific discipline.
