Our team FLA²IR did a fantastic job during the European Robotics Challenge (EuRoC), especially in the last phase with the pilot at Adam Opel GmbH in Ruesselsheim. We are proud to invite you the Award Ceremony on the 20th June at AUTOMATICA Munich, Start-Up Arena (Hall B4), at 4 pm.

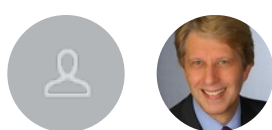

Please also visit our award winning live demo, showing a flexible polymer sealing assembly with a large industrial robot and our intuitive web-based programming tool CAD-2-Path – find us at Booth 417, Hall B4.

We'd be happy to give you a live presentation!

Best, Arne
