Longer hours on social media may increase teens' risk of cyberbullying

Researchers found that school children in Romania, Germany and Poland were more likely to experience cyberbullying, if they used social network sites for more than 2 hours a week day.

In the face of recent racist incidents at his PhD alma mater, plant-systems biologist [@drdevangm](#) considers his own experiences of racism and why he didn't raise them with his supervisors at the time.

[Traduci il Tweet](#)

"Scientists, as a community, must practise having tolerant conversations about intolerance."

Lab heads should learn to talk about racism

Senior academics must step up and take the lead in discussing intolerance, says Devang Mehta.
